SPECIAL ISSUE

THE EURAMERICAN COAL PROVINCE: CONTROLS ON TROPICAL PEAT ACCUMULATION IN THE PALEOZOIC

A selection of papers presented at the Geological Association of Canada Annual Meeting, Wolfville, Nova Scotia, May 25-26, 1992, sponsored by the Global Sedimentary Geology Program, National Science and Engineering Research Council, Nova Scotia Department of Natural Resources

Edited by

J.H. CALDER[a] and M.R. GIBLING[b]

CONTENTS

The Euramerican Coal Province: controls on Late Paleozoic peat accumulation
J. H. Calder and M. R. Gibling 1
World peat occurrence and the seasonality of climate and vegetation
A. L. Lottes and A. M. Ziegler 23
Paleobotanical and paleoecological constraints on models of peat formation in the Late Carboniferous of Euramerica
W. A. DiMichele and T. L. Phillips 39
The nature and influence of fire in Carboniferous ecosystems
A. C. Scott and T. P. Jones 91
Euramerican tonsteins: overview, magmatic origin, and depositional-tectonic implications
P. C. Lyons, D. A. Spears, W. F. Outerbridge, R. D. Congdon, and H. T. Evans Jr 113
Coal and oil shale of Early Carboniferous age in northern Canada: significance for paleoenvironmental and paleoclimatic interpretations
A. R. Cameron, F. Goodarzi and J. Potter 135
Variations in seam thickness, coal type and coal quality in the Namurian succession of the Intrasudetic Basin (southwestern Poland)
M. Mastalerz and K. R. Wilks 157
Comparison of drier- to wetter-interval estuarine roof facies in the Eastern and Western Interior coal basins, USA
A. W. Archer, H. R. Feldman, E. P. Kvale and W. P. Lanier 171
Agglutinated foraminifera and thecamoebians from the Late Carboniferous Sydney coalfield, Nova Scotia: paleoecology, paleoenvironments and paleogeographical implications
W. G. Wightman, D. B. Scott, F. S. Medioli and M. R. Gibling 187
Mine level analysis of planar and raised peat deposition in a wave- and tide-influenced deltaic shoreline setting; Beckley bed (Westphalian A), southern West Virginia
J. R. Staub 203
The Backpit seam, Sydney Mines Formation, Nova Scotia: A record of peat accumulation and drowning in a Westphalian coastal mire
J. C. White, M. R. Gibling and W. D. Kalkreuth 223
Petrographical, palynological and geochemical analyses of the Hub and Harbour seams, Sydney Coalfield, Nova Scotia, Canada—implications for facies development
D. Marchioni, W. Kalkreuth, J. Utting and M. Fowler 241
Aspects of seismic character and extent of Upper Carboniferous Coal Measures, Gulf of St. Lawrence and Sydney basins
A. C. Grant 271
Paleoecology of the Fire Clay coal bed in a portion of the Eastern Kentucky Coal Field
C. F. Eble, J. C. Hower and W. M. Andrews Jr 287
Continental hydrology and climatology of the Carboniferous Joggins Formation (lower Cumberland Group) at Joggins, Nova Scotia: evidence from the geochemistry of bivalves
U. Brand 307
The impact of climate change, tectonism and hydrology on the formation of Carboniferous tropical intermontane mires: the Springhill coalfield, Cumberland Basin, Nova Scotia
J. H. Calder 323
